SAHIL SHARMA

WEB DEVELOPER

PROFESSIONAL SUMMARY

I am a Good Web Developer with 1+ years of experience in the field. My expertise is in creating, developing and maintaining websites using HTML, CSS, JavaScript, React and MongoDB . I have a deep understanding of the latest web-related technologies, design principles and coding techniques. I have been successful in developing websites that are user-friendly, reliable and efficient. My greatest achievements include designing and launching a website for a client that increased their online sales by 20%, as well as developing a web application which reduced manual effort by 50%. My best qualities are my attention to detail, my problem-solving skills and my ability to think outside the box. I am also an excellent team player who is able to work independently and collaboratively in order to meet deadlines.

EXPERIENCE

- -

  /
  I had started my internship in IT Futurz company and having 4 to 6 months of experience.

  And started Learning the coding languages to implement them on the projects.

  And worked on live Projects as per requirements. And learned other languages like React.js Node.js and Wordpress.

PROJECTS

- /
  I had created Both Local and Live Projects. All Projects are created in different Language.

  I had created Telesia , Turant Loans which are the live project and other live projects which are in Wordpress Language.

  And also created MERN stack which are on localhost , with Mern language i had created Ecommerce Website .

  It has all the functions which includes Admin Panel through which the owner handles the entire site.

  It also has CRUD operation which performs all the functions , and different function which are related to functions of ecommerce site.

  And created some small Demo projects like weather app , TODO List and other small demo projects . I am having basic Knowledge in in SQL like queries and other basic concepts.
